

VizAlert V2

The revolutionary new heads-up display for radar detectors

Stop missing alerts

Start missing tickets!

The VizAlert is the most advanced motorcycle radar detector display in the world. It's the only one with a 6-color LED display that:

- Gives different color alerts to identify different radar bands & laser,
- Flashes faster as the signal gets stronger nearer the speed trap,
- Has a daylight sensor for automatic dimming at night, and
- Also works with laser jammers.

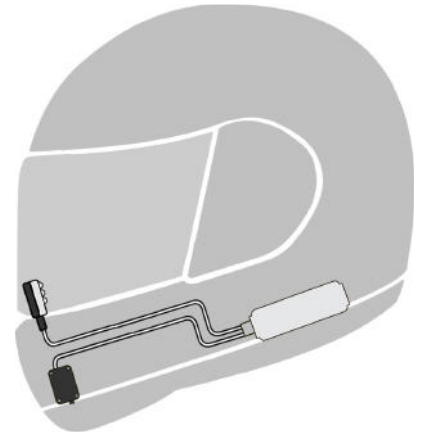

The VizAlert V2 is 100% discreet, designed for installing completely inside a full-face helmet.

Now there's a new way you can stop missing radar detector alerts, and start missing tickets!
